

Let's talk about Design and Dementia!

[The Design and Dementia Community of Practice](#) is hosting a Fireside Chat on **October 22nd 2012** from **12:00 -100 PM EST – Registration is free!**

This online event will seek your valuable feedback about our design tools and whether you or your organization have been able to put them to use in your practice. In particular we are interested in:

- What do you find useful about the tools?
- What do you think can be improved?
- **If you haven't used them-** What do you need in order to start?
- What questions do you have for us?

We look forward to hearing from you and for the opportunity to share what we are working on now!

Please RSVP: <http://www.surveymonkey.com/s/designonline>

Have a question? Please contact our AKE Knowledge Broker [Felicia White](#)

To access our tools please click on a link below:

- [Lighting](#)
- [Doorways](#)
- Noise: [physical](#) and [social](#)

The collage shows four pages from a guide titled 'Dementia-Friendly Design Considerations'. The pages are:

- Doorways:** Discusses recommendations for doorways to prevent falls and address safety concerns. It includes a diagram of a doorway and lists key considerations like door height, width, and swing.
- Lighting:** Explains how lighting affects mood and safety. It includes a diagram of a light fixture and lists key considerations like adequate lighting, glare, and color rendering.
- Noise (Part 1):** Discusses how noise affects behavior and safety. It includes a diagram of sound waves and lists key considerations like sound absorption and noise reduction.
- Noise (Part 2):** Discusses how noise affects behavior and safety. It includes a diagram of sound waves and lists key considerations like sound absorption and noise reduction.

Thank You!
