Dementia is NOT the end:
Bridging research and global care practices
through arts, creativity and technology

Rationale

“[u]nderstanding how Alzheimer’s is perceived and represented can help interrupt and change the experience of the disease for those who suffer, those who anticipate suffering, and those who care for its victims”

--Anne Davis Basting

Overview

Arts for Dementia aims to be a curated platform of arts based information for care partners looking for positive and fun activities to stay connected to their loved ones who are affected by Alzheimer's disease and other dementias, at home and in the local community. The project encourages Culture Change advocacy and it was conceived at DementiaHack'15.

alzheimer's  association®

THE BRAINS BEHIND SAVING YOURS:

Mission

- Change the tragedy-infused discourse surrounding dementia.

In order to ...

- Make the lives of people living with the diagnosis of dementia and their families less tragic and more positive and meaningful

Vision

ArtsForDementia provides a place where caregivers can find activities and ideas to interact with their loved ones with dementia through arts-based methods.

Effectively **ArtsForDementia** is a hub for upworthy resources and culture change advocacy and activism.

Our inspiration

Our inspiration is to promote empathy within the global society. We are looking for champions to bring arts based projects into local communities, disseminate knowledge about engaging activities and meaningful lifestyles with dementia.
