

DEMENTIA-RELATED VISUAL IMPAIRMENT SURVEY: INSIGHTS FROM PRACTITIONERS

Are you a practitioner working with people who have rare dementias? Share your perspective on what services work best and how barriers to continuous support can be reduced.

- **How do local practitioners and support networks minimize barriers to continuous support for people living with dementia-related visual impairment (posterior cortical atrophy)?**
- **What are your recommendations to improve brain sight support and care pathways?**

YOUR INVOLVEMENT

- **You are a health or social care practitioner or researcher working with people with rare dementia.**
- **Complete a survey which will take approximately 15-20 minutes.**
- **Participate in an optional 30 minute interview.**
- **You may be eligible for a gift card for your participation.**
