

Canada's largest network dedicated to enhancing the quality of life and supports for persons living with dementia, as well as age-related mental health and neurological conditions.

What Makes Us Unique?

With a membership of over 12,500 that reaches across Canada and across sectors, we focus on the national and provincial sharing and dissemination of research, resources and knowledge.

What are the Benefits of Partnering with Us?

Health Care Partner Collaboration

brainXchange excels in connecting people, ideas, and resources by leveraging our extensive health care partnerships. Our strength lies in networking, further developing existing relationships, and creating new partnerships to help you achieve your goals.

Continuous Quality Improvement & Innovation

With over 15 years of experience and extensive knowledge of brain-health needs related to aging, the team at brainXchange provides insight, expertise and tools to facilitate and enhance access to current, and credible knowledge for continuous quality improvement and innovation.

Our Services

Webinars & In-person Events

- Produce and manage uniquely tailored events that connect to the right audience, increase engagement and facilitate knowledge translation and exchange within and between healthcare sectors.

Communities of Practice

- Facilitate groups that promote mutual support, shared learning, and the generation of new knowledge to advance practice on specific topics.

Knowledge Product Development

- Identify promising innovations with the potential to make positive change in the healthcare of older adults, leading to the development and distribution of knowledge products, tools and resources to move knowledge into practice.

Resource Centre

- Custom online repositories, which can be tailored to a specific audience, providing access to a wide range of current and reliable health care related resources to support knowledge exchange and practice.

Collaboration Spaces

- Private, password-protected online spaces that facilitate group interaction, knowledge sharing, resource exchange and the development of tools.
